Panasonic SIP Cordless Phone System

Better Communication / Increased Savings / Optimal Flexibility

SIP (Session Initiation Protocol) technology allows you to route your calls over the internet (VoIP) for reduced hardware costs and increased savings on your monthly phone bill. Touted as the “wave of the future” with countless software options – this brand new channel of communication can run your entire telephone system!

About Panasonic SIP Cordless Phones

Panasonic SIP Cordless phones are certified with both Broadsoft and Digium, and are specifically created for IP-Centrex/Hosted PBX Services. They are the perfect mobility solution for small business and home offices.

- **Extended support** – Panasonic TGP phones provide support for up to 8 SIP registrations (up to 8 DID lines or extensions)
- **Expandable** – Up to 6 DECT 6.0 Cordless Handsets
- **Supports** – G722 (Wideband), G711, G726 and G729 codecs
- **Key feature functionality** – Includes Barge In, One-Button Transfer, Shared Call Appearance and Internal Conferencing Capabilities
- **DECT 6.0 Technology** – Crystal clear voice quality, immune from interference, encrypted and secure
- **Flexible configuration options** – Add handsets wherever you need them. All you need is an electrical outlet nearby.
- **Easy to use** – Intuitive design puts you in control of your system

Panasonic KX-TGP500 & KXTGP550 SIP Cordless Phone Systems

Details that make a difference

With the Panasonic KX-TGP series SIP Cordless Phone System, you can quickly and easily add up to 6 cordless handsets — and up to 8 separate phone numbers. All you need is a single internet connection and an electrical outlet near wherever you want to add a handset. And because they employ DECT technology, you'll enjoy a secure connection and crystal-clear sound. These SIP endpoints were designed for Open Source and Hosted SIP Deployments.
